Abstract (en)
A hanging clothes drying rack comprising an open or closed perimetric frame (10), between peripheral regions of which there are rod-like elements (14) over which the clothes are hung, the frame (10) being associated in two mutually opposite regions with respective supporting arms (15); each one of the arms (15) is pivoted to a corresponding frame element (11) and is coupled so that it can slide along the frame element (11), the portion of the arm (15) designed for coupling to the frame (10) being provided with a comb-shaped edge (18), between the teeth (19) of which at least one of the rod-like elements (14) over which the clothes are hung is arranged in abutment when the arm (15) is at right angles to the plane of arrangement of the frame (10).
