Abstract (en)

[origin: EP1441423A1] The connector has a housing (8) with a series of canals that are designed to receive an electrical contact presenting setting pads at an end for fixing a conductor (7). A face of the housing is provided with a locking unit formed by elastic pads terminated by pins (20) that is designed to be inserted in the opening. A body of electrical contact and setting pads are immersed in a plastic molding material.
