Abstract (en)  
[origin: WO03037140A1] The invention concerns an adaptable work station designed to receive at least two computer screens (15) and one or several control members (25), such as one or several keyboards and/or one or several mice, said workstation comprising a work platform (20) supporting the control member(s) (25), and at least a screen supporting element (10). The invention is characterized in that each screen supporting element (10) supports at least two computer (15) screens and is vertically mobile upwards independently of said work platform (20).
