Abstract (en)  
[origin: WO03037571A1] The invention relates to a hand machine tool, especially a paving breaker, comprising a housing (10), a hammer tube (12) and a tool receiving element (14) which is separated from the hammer tube (12) and which can be fixed in the direction of rotation (18) by at least one locking body (16). The tool receiving element (14) can be fixed to the housing (10) in a radially outward position in the direction of rotation (18) by means of at least one transmission unit (20).
