Abstract (en)

[origin: WO03039874A1] The invention relates to a cleaning method and device for a printing roller. According to the invention, the washing liquid is only applied to discrete longitudinal wetting zones (52) of a roller to be cleaned, thereby leaving untreated longitudinal non-wetting zones (54) in between. During rotation of the rollers, the washing liquid flows onto the longitudinal non-wetting zones (54).
