Abstract (en)

[origin: WO03038166A1] The invention relates to a drive (37) for the spinning rotors of a rotor spinning machine each comprising a rotor plate and a rotor shaft, which is supported by a support bearing and pressed against the support bearing (21, 22) by a pressing element. The invention is characterized in that an electric drive motor (37) is provided for each spinning rotor and enables the spinning rotor to be indirectly driven.
