Abstract (en)
[origin: DE10154848C1] The mobile container (C) has a function zone and a module (TM) for the energy supplies and/or air conditioning for the function zone. The module can be moved in and out of the container. The module has an outer closing plate (AA), and a closing plate (AI) towards the container which remains in place at the container opening when the module is withdrawn. When the module is inserted, both closing plates are bonded to the container shell.
