Abstract (en)
[origin: WO03038781A1] A traffic light (1) that includes as part of the signal an indication of how much time remains before the traffic light command (3) changes in order to insure motorist and pedestrian (2) safety. A "real-time" advisement of the time remaining in which the directive and active signal is displayed; wherein an icon (8) reveals the time remaining as part of the associated signal; wherein one or more of the signals meant to relay a directive message comprises as part of that signal, a mechanism for visual representation that advises the "real-time" that signal is to remain in the current state of advisement.
