Abstract (en)  
[origin: EP1442842A1] The disc has a continuous smooth curvilinear configuration (10c) beyond a flat central portion (10a). A zone (Z1) adjacent to the central portion has a first radius (R1) and extends into a zone (Z2) having a different radius (R2). The zone Z2 comprises the part of the edge of the disc that has carbide platelets or diamond-tipped segments. The configuration of the zones defines a guiding path with a claw movement.
