Abstract (en)
A bag (100) is disclosed as including an opening at an open end (102) and a seal (108) adjacent to a closed end (104), in which the bag is movable between a collapsed configuration in which the bag is flat and an expanded configuration in which the opening is closed and the bag is fully inflated, and the seal is non-straight when the bag is in the collapsed configuration, and the seal is straight when the bag is in the expanded configuration.
