Abstract (en)
[origin: EP1443001A1] The device has a locking assembly constituted by a flange (4) and a fastener rotatively mounted around a pivot axis (41). The assembly permits detention of a locking axis (31) integrated to a box fixed at an upper part of a dustbin. The axis is tightly maintained behind a closing surface of the fastener. The axis (41) is accessed by an assembly tool to release the axis (31) and unhook the dustbin from a vertical support.
