Abstract (en)
[origin: EP1443182A2] Formed in a first structural component (6), a cooling gas channel (19) links a first hollow area (9) to a second hollow area (10). On a side of a power plant opposite from the second hollow area there is a second structural component (16) that separates the first hollow area from a third hollow area (12). The second structural component can be adjusted in an adjusting area.
