Abstract (en)

[origin: WO03039323A1] The invention relates to a roller retainer for dishwashers, which can be produced by only few production steps, can be installed in the dishwasher in few installation steps and receives rails that are suited to bear dish racks. According to the invention, the roller retainer is provided with a central element adapted to be permanently fastened to the tub. A roller element is disposed on the central element and adapted to receive rail elements, said central element being directly fastened on the tub.
