Abstract (en)

[origin: FR2829514A1] The display unit consists of a rigid plastic housing with a cavity containing a stack of vertical panels indicating different road hazards. Each panel has an identification tag on one side and a handle at the top, and the required panel is placed at the front of the stack so that it shows through a window. The back of the housing is closed by a hinged shutter, and its lower part has feet with holes for ballasting weights. The display unit consists of a rigid plastic housing (1) with a cavity containing a stack of vertical panels indicating different road hazards. Each panel has an identification tag on one side and a handle at the top, and the required panel is placed at the front of the stack so that it shows through a window (2, 3). The back of the housing is closed by a hinged shutter (4), and its lower part has feet with holes (Y,Z) for ballasting weights.
