Abstract (en)  
[origin: EP1445190A1] The bathing raft has a lift structure with a buoyant hull and a through passage containing a body holding module for at least one person, a bearer structure attached to the buoyant hull via a first cut point, and a holding structure fixed to the body holding module which is itself held on the bearer structure via a second cut point. At least one of the cut points is adjustable in height relative to the buoyant hull.
