Abstract (en)
[origin: EP1445205A1] Reinforced pallet comprising two identical halves joined at the middle and are made of recycled polystyrene, inside which are provided reinforcement bars (4) and (5). Each half (12) is identical and is provided with radial ribs (3) with a raised core, forming a panel with a top face (1) and a bottom face (2), constructed so that it allows its transport by a forklift and chains or slings, for which there are recesses (7) provided on the top face, which together with the undersized lower face allows its transportation by chains.
