Abstract (en)

[origin: EP1445211A1] There is described a rigid or semi-rigid absorbent pad (10) suitable for the packaging of food products. The pad (10) includes a support (11) made of a liquid impermeable material having two flat opposing surfaces, and a mat of liquid absorbent material (12) laminated over one of the surfaces of the rigid or semi-rigid support (11). The mat of liquid absorbent material (12) has a surface smaller in size than that of the rigid or semi-rigid support (11). The portion (13) of the surface of the support (11) not covered by the mat of absorbent material (12) is provided of means (30) for binding the pad to a container, which means (30) do not encircle the mat of liquid absorbing material (12) in a continuous manner. Also described is a process for the manufacture of the pad and a package comprising the pad (10) and a container (20). <IMAGE>
