Abstract (en)
[origin: EP1445399A2] The scaffold ladder module has two side frames (2,3) each having three vertical uprights (4-6), the center upright (6) of which divides the respective supporting cross members into an inner (8) and outer (9) side section. The spacing of the two respective inner side supporting cross members corresponds to the cross member spacing of a side frame of a ladder less scaffold module, whereby the inner side ladder upright (14) is located between the center upright of the frame and scaffold covering (15) connecting the inner side supporting cross member sections.
