Abstract (en)
[origin: CA2467685A1] A towing member for a piece of towable baggage (22) is provide with towing handle (26) that is pivotal in two dimensions relative to an arm portion (24) of the towing member (20) and can be locked into a plurality of predetermine d positions. The pivotal relation of the towing handle and the arm potion enables the towing handle to be rotated into a position where a person can grasp the towing handle in a comfortable position by his or her side when th e piece of baggage is being towed and also improves the maneuverability of a towable piece of baggage by reducing the need for a person to twist his or h er wrist when steering the piece of baggage. The invention also allows the towi ng handle of retractable towing members to lies flush with the baggage and will not become snagged on other items.
