Abstract (en)
[origin: WO03037277A1] The invention concerns cosmetic and dermatological topical formulations, in the form of oil-in-water emulsions containing 0.05 to 2 wt. %, relative to the total weight of the formulations, of one or several ethoxylated fatty acid esters selected from the group comprising PEG-5 to PEG-100 stearates combined with (A) 0.1 to 6 wt. %, relative to the total weight of the formulations, of glycerol monostearate, or combined with (B) 0.1 to 8 wt. %, relative to the total weight of the formulations, of one or several C16-C18 fatty alcohols, or combined with (C) 0.1 to 6 wt. %, relative to the total weight of the formulations, of glycerol monostearate and 0.1 to 8 wt. %, relative to the total weight of the formulations, of one or several C16-C18 fatty alcohols. Said formulations also have a content of 0.5 to 20 wt. %, relative to the total weight of the formulations, of glycerin and 0 wt. %, in particular 0.1 to 30 wt. %, relative to the total weight of the formulations, of one or several lipids having a polarity index of 5-30 mN/m, in particular 10-25 mN/m, the range of the index being also applicable to the lipid mixtures, as well as water and optionally active agents, adjuvants and/or additives.
