Abstract (en)

[origin: US2004011112A1] The invention relates to an apparatus for spreading and shaping can bodies, having a pin-like shaping tool that is forced from one end into the can body to be widened and a counter tool. According to the invention the counter tool is also a pin-like shaping tool insertable from an opposite end into the can body, the shapes of the ends of the two pin-like shaping tools being the same or complementary according to the desired shape.
