Abstract (en)
[origin: WO03044587A2] The ventilated glasses system (10) with a removable pad (12) and detent (14) includes an eyeglass frame (16) and an inner frame (36) with the pad (12). The first aperture (28) and the second aperture (30) are located on the nostril bridge support (26), where condensation tends to be the most prevalent. Air can flow from the exterior surface (18) to the interior surface (20) through the first aperture (28) and the second aperture (30). Detents (14) securely attach the inner frame (36) to the eyeglass frame (16).
