Abstract (en)

[origin: EP1447339A1] Reclosable bags (2) having a slider-actuated string zipper (4) and a tamper-evident feature (44). In one aspect, the reclosable bag comprises: a receptacle having a mouth and an interior volume; a string zipper (4) installed in the mouth; a slider (10) mounted to the string zipper (4); and a tamper-evident feature (42) that blocks access to all or a portion of said interior volume. The tamper-evident feature (42) may take the form of an internal membrane (42,44) that partitions the interior volume or an external header (156,160,FIG. 22) that covers the string zipper (4). In some embodiments with a partitioned interior volume, the tamper-evident feature comprises a peel seal (128,FIG. 16). <IMAGE>
