Abstract (en)
[origin: EP1447508A2] Guide rail arrangement (60) for a sliding door, sectional door, etc. comprises a guide rail (7) with a longitudinal slot (18), and a receiving arrangement (61) for the shell (3) of the door which has a support (20) for the shell arranged in the guide rail and spanning the longitudinal slot. The support is spring-mounted and displaceable in the direction of the longitudinal slot. Preferred Features: The support can be moved over a large part of the length, especially over the entire length of the guide rail.
