Abstract (en)
[origin: EP1447775A2] The remotely controlled electronic locking arrangement (10,12) has a receiver/transmitter circuit (34,36,44) for a key part (10) for communications with a lock part (12) of the locking arrangement. The receiver/transmitter circuit can be changed into an energy-saving mode and a sensor (38) is provided on the key part to activate and/or deactivate the energy-saving mode. An independent claim is also included for the following: (a) a method of operating a receiver/transmitter circuit for a key part for communicating with a lock part.
