Abstract (en)

[origin: EP1448020A2] The hearing aid (1) remote control arrangement has an input device (3) for the manual entry of control data with a projection device for projecting virtual input elements (5,6) and a sensor device for detecting the operation of the virtual input elements. The virtual input elements include images of buttons, rotary switches and/or slide switches. An independent claim is also included for the following: (a) a method of remote control of a hearing aid.
