Abstract (en)
[origin: WO03044035A1] The invention relates to medicaments containing phospholipid derivatives preferably of unnatural nucleosides of general formula (I), wherein R1 represents an alkyl chain with 10-14 carbon atoms, R2 represents an alkyl chain with 8-12 carbon atoms, n represents a whole number from 0 to 2, R3 represents a hydroxy group, R4 and R5 represent hydrogen and B is a 5-fluorouracil. Said derivatives are used as antitumoral or antiproliferative active ingredients for the prophylaxis and/or curative, palliative or supportive treatment of tumor diseases or neoplasia such as carcinoma, sarcoma, lymphoma or leukemia, and also as monotherapeutic or monoprophyllactic agents in free or fixed combination with other prophylactic or therapeutic modalities.
