Abstract (en)

[origin: WO03035737A1] The invention relates to compositions containing: A) 80 to 99.99 percent by weight of one or more partial esters of fatty acids having 6 to 22 C atoms and polyvalent alcohols selected amongst the group consisting of glycerin and polyglycerin and B) 0.001 to 20 percent by weight of one or more perchlorates. Said compositions are suitable as internal antistatic agents for thermoplastic synthetic materials.
