Abstract (en)

[origin: WO03046091A1] Disclosed is the use of a coating composition containing the following in relation to the weight of said coating composition: up to 20 % of a layer forming component; 0 -20 % of an additive, 0 - 20 % of a solutizer; the remainder leading up to 100 % being water and/or one or more water-soluble solvent which is present in an amount of 0 -30 %, for producing a temporary protective layer against pollution and electrostatic charging on plastic surfaces.
