Abstract (en)  
[origin: WO03044255A1] A device for keeping clean the regions of textile machines that are in contact with feed threads, particularly for hosiery knitting machines or the like, comprising a housing (2) that delimits a space (3) around a region where the thread (4) makes contact with a supporting and/or guiding and/or braking element (5) arranged along the path followed by the thread (4) from the spool to a thread guide of the machine, where dust is generated and/or accumulates, and an aspirator device (6) which is connected to such space (3).
