Abstract (en)
[origin: WO03044954A1] A circuit arrangement for the reliable switching of electrical circuits comprises two longitudinal branches (12), with two switching elements (11,12) arranged parallel to each other in one of the branches, the switch inputs (20) of which are connected to the input point (4,5) of the longitudinal branch and the switch outputs (21) of which are each connected to the input side of a winding (8,9) on a transformer (10).
