Abstract (en)

[origin: EP1449448A1] A waterproof, water vapor permeable functional layer (2a) is arranged adjacent to an exterior upper (1). An interior upper has a lower end region that substantially extends beyond a lower end of the exterior upper, and is joined to the exterior upper and an insole (4). The lower end region of the interior upper that extends beyond the exterior upper is folded outwards in such a way that the functional layer in the entire end region (2b) is turned back on itself, and the interior upper has a lower edge arising from the folding, that the free end of the outwardly folded interior upper is joined to the exterior upper, and that the lower edge of the interior upper is joined to the insole.
