Abstract (en)

[origin: EP1449599A1] The system has a tightening body with a tightening surface that cooperates with one of fixing surfaces of a tool. A blade has an elastically deformable branch (58a) integrated with a tightening clamp (20). Another branch (58c) of the blade has an end penetrated through a retention groove (38) and a part cooperates with a lower edge (38b) of the groove when the tool is pivoted. An angular part is located between the branches.
