Abstract (en)

[origin: EP1449622A2] Powered driving-in device (2) comprises a driving-in tool (13) for fixing devices (15), a head part (4) arranged on an outlet opening (10) of a guide tube (12) of the driving-in device, and a holding arrangement automatically receiving and releasing fixing devices supplied to the head part via the guide tube. The head part has a rotating connection with the driving-in device. Preferred Features: The head part has at least two fixing positions relative to the driving-in device. The fixing positions enclose a pivot angle of 90[deg].
