Abstract (en)

The tool has a gripping handle (10) with a coating (11, 12) of shock absorber material. The handle has a visual wear check. The material is a translucent coating material (11), which constitutes the wear check by a change of state. The handle works in percussion according to an axis of the tool. The coating equalizes shock constraints and mechanical vibrations in the material according to conformation.

Abstract (fr)

La poignée (10) de l'outil comporte un revêtement (11, 12) en matériau amortisseur avec un témoin visuel d'usure (11, 25, 50). C'est un matériau translucide (11) du revêtement de la poignée (10) qui constitue le témoin d'usure, par changement d'état. <IMAGE>
