Abstract (en)

[origin: EP1449969A2] Device for holding a WC deodorant is in the form of a hook for attaching to the upper edge of a toilet bowl and consists of a first arm (10) extending downward from the upper edge of the toilet bowl on the inner side and to which a WC deodorant is attached, a second arm (50) extending downward from the upper edge of the toilet bowl on the outer side, and an intermediate part (30) lying on the upper edge of the toilet bowl and connecting the first and the second arm. Devices (32) are provided for adjusting the width of the holding device and/or devices (12) are provided for adjusting the length of the first arm. Preferred Features: The intermediate part is provided with the devices for adjusting the width of the holding device.
