Abstract (en)

[origin: EP1450218A1] The device has two pairs of support faces on a gauge (C) with one face comprising an upper supporting side (1) and other comprising a lower supporting side (2). Two thrusts (3) on an assembly disc (E) are co-operated with the lower side and sides of clamps (4). A screw (8) is screwed on the threaded lower end of a case (5) and supported against one of the sides of the clamps of the disc. An independent claim is also included for a method of fixing a gauge on an assembly disc.
