Abstract (en)
[origin: WO03043906A1] The invention relates to a distributing device for a sanitary agent for cleaning and/or disinfecting and/or for releasing fragrance, preferably for using in sanitary objects such as toilet bowls and sinks. The inventive device comprises a container for receiving the sanitary agent, said container being thus provided with a receiving chamber (5) which is defined by a housing (1). According to the invention, a manually operable discharge device (9, 13) is provided, comprising a discharge piston (9) which is arranged in the receiving chamber (5) and is used to displace the sanitary agent from the receiving chamber (5) of the container in the direction of an outlet (7) of the container, in order to thus apply the sanitary agent to the sanitary object.
