Abstract (en)

[origin: FR2833021A1] The invention concerns a method and a device for controlling a line of drawing rollers of a textile machine (1 and 2) mounted on bearings (6) and a pressure cylinder (3), which is pressed against the two drawing rollers (1 and 2), an optionally a calender roller (16) co-operating with a pressure cylinder (18) Said method is characterized in that it consists essentially in driving in non-slip rotation one of the drawing rollers (1) and in driving in friction rotation the other drawing roller (2). The invention is most particularly applicable in textile machines, in particular drawing and finishing machines.
