Abstract (en)
[origin: WO03046278A1] The invention relates to a press roller (1) for forming a press gap with another press roller (1), comprising a rotating roller sleeve (3), a roller axle (4) and a support device (5), connected to the roller axle (3) for support of the roller sleeve (3). The invention further relates to a method for changing the support device (5). According to the invention, the exchange can be achieved more easily, whereby the support device (5) is arranged within the roller sleeve (3) in a pivoting manner.
