Abstract (en)

[origin: WO03046292A1] Present invention relates to a spilway of a hydro power plant dam, weir or similar hydraulic structure with improved dissipation object. To this aim, in the area of at least one sidewall (4', 4'') of the spilway at least one dissipation beam (5', 5'') is available, extending thereby at least essentially in the longitudinal direction with respect to a flow-direction, and protruding sidely into the said spilway area.
