Abstract (en)
[origin: EP1452657A2] The facade, consisting of a support construction (7) with several supports for the mounting of facade elements (4) such as glass panes, has a pressure rail (2) which presses the facade element against the supports. A seal is provided between the pressure rail and facade elements, and an insulating block between the pressure rail and supports. The facade, consisting of a support construction (7) with several supports for the mounting of facade elements (4) such as glass panes, has a pressure rail (2) which presses the facade element against the supports. A seal is provided between the pressure rail and facade elements, and an insulating block between the pressure rail and supports. The insulating block (1a) and seal (1) are constructed in one piece and form a unit (110), and the unit may be manufacture from one or different materials.
