Abstract (en)
[origin: WO03047346A1] The invention relates to novel herbicidal active substance combinations containing known substituted carboxylic acid anilides of formula (I), in which n, A, Ar, R<1>, R<2>, R<3> and Z have the meanings as cited in the description, one or more known herbicidally active compound(s) and/or optionally containing a compound that improves cultivated plant compatibility. The invention also relates to the use of these active substance combinations for controlling weeds in different useful plant crops and for controlling monocotyl and dicotyl weeds in the semi-selective and non-selective area.
