Abstract (en)

[origin: US2005023181A1] A storage device which is suitable for presorting and having ready medicaments, particularly solid medicaments, and which is adapted to the medically prescribed, individual intake rhythm of the corresponding patients in such a way that the right dose can be administered at prescribed times without any problem. The storage device is in the form of magazines in which several receptacles (B) are stacked in semi-inclined position in a receiving container (A).
