Abstract (en)
[origin: CA2470120A1] The invention relates to a patch cable management system. Said patch cable management system for an optical waveguide distributing device comprises a number of plug modules (11) and/or splice modules, which are arranged inside a sub-rack, and has an electronic patch cable localization. According to the invention, at least one electronic module (17) is provided, which can be positioned as desired inside the optical waveguide distributing device, can be connected to the plug modules (11) and/or the splice modules, and which supplies power to the plug modules (11) and/or to the splice modules and carries out the electronic addressing of the inserted plug modules (11) and/ or splice modules. .
