Abstract (en)
[origin: EP1454728A1] The milling machine has a milling unit which is connected to the base frame (1) via a transmission flange (22) so that it can turn and be removed. There is an electric motor on one side of the transmission flange and a milling tool (23) on the other. The milling unit and the holder are connected by a connecting screw (7) to the base from so that they can be detached from it.
