Abstract (en)

[origin: EP1455075A1] The exhaust pipe comprises two angled exhaust pipes the first ends (18,20) of which extend from the fire face of the cylinder head two exhaust seats. The bored internal wall of the first ends define two calibrations of diameter D. The second ends of the angled pipes join symmetrically to form a junction located near a plane tangent to two cylinders defined by the calibrations and which cuts the angled exhaust pipes.
