Abstract (en)  
[origin: WO03053388A1] The invention relates to a method for reducing odor or sweat formation and to a cosmetic product to be applied in the form of a foam of a deodorant or antiperspirant substance. The cosmetic product consists of a foam dispenser that is operated either with air or with a volatile propellant, and a liquid, foaming composition. Said composition contains water or a water-ethanol mixture as the support, at least one foaming surfactant, at least one oily component liquid at 25 DEG C, at least one perfume oil, at least one non-ionic hydrophilic solubilizer for the perfume oil and at least one deodorant or anti-perspirant substance.
