Abstract (en)  
[origin: WO03050009A2] A container, particularly a bottle containing beverages, is closed at the opening (2) of the bottle body (1) with a sealing element (3) made of glass or synthetic material. A fixing element (6) is releasably fixed to the bottle body (1) and retains the sealing element (3) in the bottle opening (2). The inventive bottle closure resolves the problems related to using corks, particularly with wine bottles.
