Abstract (en)

[origin: FR2832390A1] The invention concerns a dispenser cap with lid for container such as an aerosol dispenser or the like. The invention also concerns a container equipped with such a cap. The lid (5) is mounted on the body (19) of the dispenser cap so as to conceal the button (6) actuating the valve (4). When the lid (5) is closed, the button (6) cannot be accidentally actuated. The invention is useful for industries manufacturing aerosol packaged products.

[origin: FR2832390A1] The spray head for an aerosol can has a base (19) which fits on to the can. A button attached to the base operates the head (4) of the aerosol valve (3). This is connected to a spray jet (10) by a tube (8). A hinged cap (5) fits over the head when it is not in use.
